

# AMWA'S WOMEN IN STEM CAMPAIGN

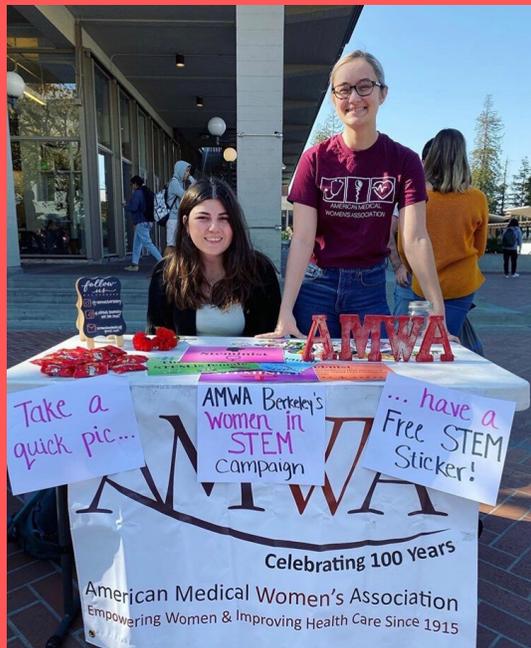

## February 10-14

We are celebrating the International Day of Women and Girls in Science (February 11) this year with a week-long social media campaign! Branches are highly encouraged to participate, and **photos will be showcased at the conference in Indianapolis**. Want to join the campaign?

Here's how:

- **Make STEMInist posters!** You can get creative with this. (We also have five posters available already that you can print.)
- During the week of February 10-14, **table on your campus!** Ask people if you can take a photo of them holding your posters. You can offer small incentives, such as STEM stickers, in exchange for their photos.
- **Post the photos on social media** (Instagram, Twitter, Facebook, etc.). In order to include everyone, feel free to make collages or include several photos per post.
- You can post through your chapter's AMWA account in addition to posting through personal accounts.
- Make sure to **tag @amwapremed and @amwadoctors** and use the **hashtag #WomeninSTEM!**
