

FACULTY LEADERSHIP PROGRAM

Gain valuable insights and effective strategies to support trainees, while refining your skills as an intentional and impactful leader.

Why Participate?

Residency and fellowship years present a unique opportunity for trainees to not only build clinical skills but also establish a strong foundation for leadership development.

The **AMWA EVOLVE Faculty Leadership Program** complements the **AMWA EVOLVE Certificate in Leadership Program** for women trainees. This innovative program is tailored to address the specific challenges often encountered during residency and fellowship. The Faculty Program empowers program directors, staff, attending physicians, and chief residents to reinforce and enhance the core leadership competencies that trainees are developing.

This program introduces effective communication techniques and coaching strategies to support women trainees as they grow into leadership roles.
