

Helping Women Travel

I help women travel so they can receive abortion care, booking airlines, ground transportation, and hotels, and arranging support for childcare and meals. Some of our clients have never been on an airplane or traveled to a large city. Some need to travel with their children. Some don't want family members to know where they're going. Some have controlling or abusive partners. I'm always amazed at the strength and resilience of our clients who have to travel for days to receive basic healthcare.
