

CONTROLLED SUBSTANCE ACT

Education for Physicians

This online module will address the Controlled Substance Act laws relating to a physician's legal right to dispense prescription drugs to patients.

Developed by Manveen Saluja, M.D., Department of Medicine, Rheumatology, Beaumont Health; Assistant Professor of Medicine, Oakland University William Beaumont School of Medicine; Clinical Associate Professor of Medicine, Wayne State University; Board Certified Rheumatologist and reviewed with permission from the United States Drug Enforcement Administration.

Through this module, learn how to...

- Describe the regulatory legal risks of prescribing controlled substances.
- Discuss the legal requirements for assessment and documentation regarding controlled substance prescription writing.
- Review the role of DEA and its authority over controlled substances.
- Identify new scheduling of controlled substances.
- Apply proper storage and record keeping practices for controlled substances.
- Properly report theft of controlled substances.
- Discuss the controlled substance act statute and identify where to find related regulations online.

This activity is approved for *AMA PRA Category 1 Credits™*.

This module provides up to 2 continuing education credits toward the State of Michigan requirement for education on pain and symptom management.
